

Iridium SC4000

SAILOR communications systems are well-known for their quality, reliability and continuous innovation; and innovative SC4000 Iridium is no exception. The Iridium system, on which the SC4000 operates, is the first truly global communications system, which means that no matter where you are and who you want to call, you always have 66 Low Earth Orbit satellites at your disposal. This is not only convenient, but, more important, a crucial safety factor.

The SC4000 is well suited for all types of vessels – from fishing boats and cargo ships to powerboats, yachts and cruise liners – even in remote areas, both on land and at sea. The SC4000 puts you in closer contact with the world.

The compact SC4000 consists of only three units: the antenna SA4110, the transceiver ST4120 and the intelligent handset SC4150 – intelligent, because it is a combined handset and control unit. It can operate with as many as four handsets, making it possible to use the system anywhere on board.

The fact that the antenna can always “see” three satellites ensures good contact at all times and guarantees a clear signal irrespective of the distance between communicating parties.

Features

Crew Facilities

- Crew Calling
- PC based SMS
- Conference calls
- Easy to use; works like a mobile phone
- Repeat call function
- Memory for up to 100 telephone numbers
- Call log
- 2.4 kbps data transmission and Iridium’s 10 kbps compressed data service
- SSAS compatible

Installation

- Up to four intelligent Handsets in any one system
- Direct Connection for PABX or standard telephones
- Easily accessed SIM-card reader
- Easy to install and requires a minimum amount of space

Import & Selling by OSCONA Co., Ltd.
